

1st Meeting: Short-term joint staff training event, Nov., 4 to 8 ,2019, Larnaka, CYP

Two Austrian teachers and their headmistress from a Neue Mittelschule in Graz , as well as Dr. Heinz Tippl from BISI visited "Agios Spyrodonas Special School" in Larnaca in November 2019.

The headmistress Dr.Anastasia Savva Georgiodou , all the teacher colleagues, the therapeutic team, as well as the students gave us a warm welcome with traditional Cypriot music and dances and delicious specialities to eat and drink.

They showed us round the school and we saw all the different facilities and rooms that they used for working with the children with disabilities. We even took part in certain workshops, like the singing and dancing classes, which gave us a good insight into their dedicated, caring work with the children. We had the most fun taking part in the special sports events for us all. We especially liked the "Snoozelenroom", where specially trained teachers gave us a treatment.

During our stay we were part of the daily routine of this special school dealing with students of different disabilities and special needs. Every day the teacher training was carried out as planned. In the plenary we discussed the next meetings with the teams from Luxemburg, Cyprus and Austria.

The happy and friendly atmosphere among all the participants made this meeting a great success.
